## TCS Results Archive – Missing Results

Sadly the archive is far from complete and we would dearly like to improve the results available. If you have any old original results stashed away then we would be very keen to publish them. At this stage in the project the first aim is to improve the coverage of events where TCS provided the event results service and a list of what is known to be missing is shown below (although there are probably a few extra events). Subsequently the aim would be to expand the archive to include results from other providers. People who supply results will have their contributions acknowledged on the results pages. If you have anything that may be of interest then in the first instance please email Martin Liddle at <a href="results20@tynecomp.co.uk">results20@tynecomp.co.uk</a>.
